

# Display floor stand

Display Floor Stand is an excellent and secure device to tilt and move your display on stage, in cinemas, at exhibitions or places where a group of peoples is gathered. It is a very effective way to present your data or information in an area limited with space. Optionally it could be used for Digital Signage where displays cannot be positioned permanently. The adjustable Display Floor Stand has a tubular construction with four wheels (two with brake) and/or four metal feet. Load capacity is up to 80 kg.
