

Stand ST 200 P

Vega ST 200 P stand is an electric driven stand supported by a base plate and intended for touch screens and displays alike which enables you to place the stand wherever flat surface is available. Its main feature is height adjustment of touch screens in the range of 50 centimetres from its basic position. Everything is controlled at the touch of a button via single wired remote control. ST 200 P can additionally be equipped with a metal shelf for laptop and/or side shelf for Mini PC. This product is suitable for touch screens ranging from 42" up to 84" or larger with maximum load capacity of up to 160 kg. These features make it ideally suited for indoor corridors as well as any place where wall installation is not feasible.
