

ST 42

Cabinet for LCD/Plasma screen

LCD and plasma screens becoming popular instruments for presentation. Problems starts to occur when this screens must be set for use and at the same time be protected well enough. With our new cabinet ST-42 we solve your both difficulties – in build stand on cabinet protected with lock&keys which make possible to set screen up to 60". Maximal weight of screen is 70 kg. Features are:

- ST-42 ensure careless storage of all devices used with screen in cabinet
- it has special holes for cables on upper and back side
- cabinet is secured on steel frame made from quality oval tubes, easy movement is ensured with wheels Ø 80 mm (two with brakes)
- it is constructed in a way that it can't be easily dismantled, this partial prevent stealing
- height of the screen can easily be adjusted
- cable clamps ensure all wires and cables leading from devices to screen are elegantly installed
